SUSTAINABLE AGRICULTURE STANDARD PROTESTS
The American National Standards Institute is prepared to endorse a sustainable agriculture standard that was crafted by the Leonardo Academy in Wisconsin. Over 30 national and state agribusiness organizations have sent a letter to the Leonardo Academy pointing out the substantive flaws in the standard.

The standard currently equates organic with sustainable and best agricultural practices. The standard also rejects the use of biotechnology and requires producers to follow organic processes rather than achieving measurable results. The groups also point out that the standard does not meet the definition of sustainable agriculture in the 1990 Farm Bill and that the standard process did not include materially affected stakeholders.

The letter was sent to the Leonardo Academy by the American Farm Bureau, American Seed Trade Association, American Soybean Association, Animal Health Institute, Biotechnology Industry Organization, CropLife America, Grocery Manufacturers Association, National Association of Wheat Growers, National Cattlemen’s Beef Association, National Corn Growers Association and others.
Information on the proposed standard is available at the Ohio
Produce Growers and Marketers
Association: http://ohiovegetables.org/standards/index.html

**WORKER SAFETY RULE CHANGE DATE EXTENDED**
Public comments were submitted to EPA for the proposed rule
changes to the agricultural worker protection and applicator
certification regulations. Because of comments that were received,
EPA must do a regulatory impact analysis on the regulations for
small businesses. The Small Business Regulation Economic Fairness
Act process includes a panel of representatives from small
businesses to offer recommendations to offset burdensome
requirements of the proposed rules. The proposed rules after this
process should be available for comment in the fall of 2009.

**WOOD DESTROYING INSECT INSPECTION – APRIL 2**
April 2 will be the next training session for inspectors wanting to
become licensed for wood-destroying insect inspections. Ohio
regulation requires a license for anyone performing insect
inspections as part of a real estate transaction. The license requires
the inspectors to attend a mandatory five-hour training session and
take a test.

Anyone interested in attending the training can go to the Pesticide
Education Program website at http://pested.osu.edu for
information. If there are any questions, they can call the program at
(614) 292-4070. The class will be held from 9:00 a.m. - 4:00 p.m.
The registration, which includes lunch, is $90 if pre-registered and
$100 at the door. Ohio State University Extension Educators who
would like to learn more about inspecting structures for insect
damage can attend the training at the discounted rate of $25. Call
(614) 292-4070 for more information.

**PUBLIC COMMENT ON EXPANDED LIST OF WATER
CONTAMINANTS**
EPA is asking for public comments on a list of 104 possible drinking
water contaminants that may be regulated in the future. The
Contaminant Candidate List (CCL) contains 93 contaminants that are unregulated and known or anticipated to occur in public water systems. The CCL process is under the Safe Drinking Water Act and lists chemicals used in commerce, pesticides, biological toxins, disinfection by products and waterborne pathogens. More information is available at: http://epa.gov/safewater/ccl/ccl3.html

RULE PROPOSED REQUIRING PESTICIDE CONTAINER RECYCLING
EPA is moving forward to propose regulations that once finalized, would require registrants of agricultural and professional specialty pesticides to recycle plastic pesticide containers. The proposed regulations will be published by the fall of 2008. A public 60-day comment period will be held on the proposed rule at that time.

COMMERCIAL NEW APPLICATOR TRAINING AROUND THE STATE
Training for commercial new applicators and trained servicepeople will be available in different parts of the state this year. The training for March 25 will be in Richland County and April 9 will be in Auglaize County. The training will also be held in Reynoldsburg at the Ohio Department of Agriculture on March 26, April 16 and May 14.

Public agencies, school districts, companies and businesses who apply pesticides are required to have a licensed, commercial pesticide applicator. Employees who are not licensed are able to work under the supervision of the licensed applicator as a trained serviceperson. The trained serviceperson must receive training on pesticide safety before applying or handling pesticides. The training must be noted and recorded in the employee’s personnel file.

The classes will offer the trained serviceperson training and also be a review of the Core material for commercial pesticide applicators preparing to take their exam. There will also be sessions for applicators preparing to take the turf (category 8), industrial vegetation (category 5) and ornamental weed (category 6c) exams.
For more information, visit the Pesticide Education Program website at: http://pested.osu.edu or call (614) 292-4070.
